DETAILED ACTION

Specification

The abstract must appear on a separate page. The specification should not refer to the claims. Correction is required.

Claim Rejections - 35 USC § 112

Claims 1, 2, and 4-14 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 first recites that there is at least **one** channel but then sets forth that there are a plurality of channels. Therefore, the claim must recite that there are at least **two** channels.

The preamble of claim 1 indicates that the spraying head is for use in an engine, however, because there is no structure that particularly limits the head to an engine, the preamble is deemed one of intended use. Claim 1 should set forth: - -In a *spray* head located in an intake of a piston engine... - -

Claims 7-9, 11, 12 and 14 set forth the engine/intake by inferential inclusion-correction is required.

It is not clear whether claim 10 is an apparatus claim or a method claim.

The dependent claims should be rewritten as - -In a - -. The claims also use awkward grammar common to foreign filed applications, i.e. "spraying head"; applicant is encourage to polish the disclosure.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the

Art Unit: 3747

invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1, 2, 4-9, and 11 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Sandvik.

There are channels 14, 16, and 18 leading to three groups respectively, different nozzles (figure 4), and regulating mechanisms V1-V6. The recitations of "especially the intake air of a piston engine" and "against/same direction of flow of the intake air" are deemed merely matters of intended use because the combination of the spray head in the intake manifold has not in fact clearly been claimed.

The term "respective channels" is deemed broad enough to read on the spaces 24, 26, and 28.

Allowable Subject Matter

Claims 10 and 12-14 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event,

Art Unit: 3747

however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
